

# SAFE AND RELIABLE BULK HANDLING

**The tipper from SKAKO Vibration offers a safe and cost effective way of handling bulk materials for most industrial process lines.**

The tipper uses hydraulic power for controlled discharge of containers up to 1240x1000x800 mm and maximum 3.000 kg. The 140° tipping and "final action" repeat tipping, ensure optimal product discharge.

The design is sturdy and sophisticated and the construction offers low maintenance with few wear components.

Various fencing is delivered with the tipper, depending on the level of automation and application.

**ADVANTAGES** ● Safe discharge ● Cost effective ● Up to 3.000 kg. tipping capacity
